Subject : Recommendation of Clément Saintier

Dear Colleague,

I know Clément Saintier since he has been admitted at the ENSIIE Engineering School in september 2015. I am also a teacher and i had the pleasure to have Clément as a student in three courses : "Operating Systems", "Network Programming" and "Advanced Programming" in his first 3 semesters of study (out of six). In all these courses, Clément ranked in the top most part of his class. The overall academic records of Clément are excellent, with a strong background in science, especially maths and physics.

I can witness that Clément is an excellent team-worker through the projects i reviewed. He is also a very open-minded person and curious and towards foreign cultural environments. His will to study abroad as part of his curriculum is therefore very logical to me.

Given my discussions with my colleague Pierre Dossantos Uzzaralde, director of the ENSIIE's International Relationships Department, who has a broad knowledge of our partners expectations, i think Clément is a very good candidate to take part into a curriculum at BUPT and i therefore highly recommend his application.

Professor Stéphane GENAUD
