Subject : Recommendation of Félix Kelpeter

Dear Colleague,

I know Félix Kelpeter since she has been admitted at the ENSIIE Engineering School in september 2015. I am also a teacher and i had the pleasure to have Félix as a student in three courses : "Operating Systems", "Network Programming" and "Advanced Programming" in his first 3 semesters of study (out of six). In all my classes, Felix has performed very well. More generally, his academic results are very good. His average overall subjects is in the top 25% of his batch for this semester.

I can also witness that Félix is a reliable, committed, and hard-working student. He is always attentive to remarks and suggestions, has good inter-personal skills, which allowed him to produce nice team work in the various projects that are part of the curriculum.

He is also interested in other cultures and his desire to study in China as part of his curriculum demonstrates this aspect of his character.

Given my discussions with my colleague Pierre Dossantos Uzzaralde, director of the ENSIIE's International Relationships Department, who has a broad knowledge of our partners expectations, i think Sophie is a very good candidate to take part into a curriculum at BUPT and i therefore highly recommend her application.

Professor Stéphane GENAUD
