Subject : Recommendation of Stéphane Kastenbaum

Dear Colleague,

I know Stéphane Kastenbaum since she has been admitted at the ENSIIE Engineering School in september 2015. I am also a teacher and i had the pleasure to have Stéphane as a student in three courses : "Operating Systems", "Network Programming" and "Advanced Programming" in his first 3 semesters of study (out of six). In all my classes, Stéphane has performed remarkably well. More generally, his academic results are very good. His average overall subjects is in the top 20% of the batch for this semester.

I can also witness that Stéphane is a very curious and enthusiastic person. His interests lie in many scientific subjects. For instance, he chose as elective subject this semester a course on Quantum Cryptography.

He is also interested in other cultures and his will to study in China as part of his curriculum demonstrates this aspect of his character.

Given my discussions with my colleague Pierre Dossantos Uzzaralde, director of the ENSIIE's International Relationships Department, who has a broad knowledge of our partners expectations, i think Stéphane is a very good candidate to take part into a curriculum at BUPT and i therefore highly recommend her application.

Professor Stéphane GENAUD
